Profile

Versatile and highly motivated aspiring developer with practical experience across a range of technologies and frameworks, including HTML, CSS, JavaScript, C++, Java, and C#. Familiar with both frontend and backend development, having worked on multiple academic and personal projects using ASP.NET MVC/Core, Windows Forms, Spring Boot, React, and basic Django with Python. Demonstrates strong problem-solving skills and a keen interest in building user-centered, functional applications. Comfortable navigating both object-oriented and web development paradigms, with a growing ability to work across the full software stack. Eager to apply knowledge in a collaborative, real-world environment while continuing to develop technical and professional skills.

Education

Faculty of Computer Science and Engineering, Skopje
OCTOBER 2022 — PRESENT

Kiro Spandzov-Brko, Kavadarci
SEPTEMBER 2017 — JUNE 2021

Electrical technician for computer technology and automation.

During this program, I gained foundational knowledge in electrical systems, automation technologies, and computer hardware. The curriculum emphasized both theoretical and practical skills, including circuit analysis, control systems, and working with microcontrollers. I also acquired hands-on experience with various computer programs and began developing software using C++, laying the groundwork for my future studies in programming and computer science.

Intership at DRAXLMAIER, Kavadarci
OCTOBER 2018 — MAY 2021

Gained hands-on experience in mechanical and electrical systems within a production environment. Worked with industrial machines such as static drills, lathes, and precision tools, developing a strong understanding of mechanical operations. Assisted in electrical installations and wiring, and became familiar with pneumatic and electro-pneumatic control systems. This experience strengthened my practical understanding of industrial automation, safety protocols, and real-world electrical applications.

Technical Skills

Programming Languages
C#, Java, C++, Python, JavaScript, HTML, CSS

Frameworks & Technologies
ASP.NET MVC/Core, Spring Boot, React.js, Django (basic), Windows Forms, Unity (basic)

Tools & Environments
Visual Studio, IntelliJ IDEA, Eclipse, VS Code, Git/GitHub, MySQL, PostgreSQL, SQL Server

Concepts
Object-Oriented Programming (OOP), Full-Stack Development, REST APIs, MVC Architecture, CRUD Operations, DDL, DML
